match.family

The most durable retractable banner display

5 good reasons to choose the **match.family**

1. Tough enough to withstand any conditions, your graphic is fully protected safely rolled up inside its aluminium case
2. A reliable all-terrain retractable display system
3. Simple set up
4. Optimised storage thanks to its travel cover
5. Maximum space-saving.

Choose the **match.** most suited to your needs

match.850 one height only : 2000 mm, width 850 mm

match.slim one height only : 2000 mm, width 460 mm

match.family applications

Create an unbeatable effect wherever you need to make a visual impact regardless of space limitations.

for example :
the four **match.850** presented here
fit in this hard case on wheels

match.850 applications

Easy to set up and highly mobile, the **match.850** is the ideal solution for any event, whatever the scale or context, such as product launches, point of sales marketing or simply for meetings with customers.

match.slim applications

match.slim

Slim, stable, light and elegant, it fits easily into limited spaces

Solution, point of sale, shops...

match.family travel solutions

Because your requirements differ depending on whether you travel by plane, by car or on foot, **duo.** offers a full range of carrying cases specially adapted to yours needs .

- Our hardwearing, reinforced, waterproof soft or hard cases offer the ultimate protection for your **match.family** products.
- Rigid containers that can fit up to four **match.** are also available (see container **hit.** page 3)

Your **match.family** in detail

Fits all types of graphic material, paper, fabric, canvas, laminated paper...

Set up instructions, videos and printing templates can be downloaded from our website www.duodisplay.com

Our commitments

Today, commitment to the environment has to be more than just an idea. It must be translated into practical measures ! That is why our Research and Development team strive to design products that are as ergonomic as possible whilst minimizing the quantity of materials used.

By working to reduce the weight of our products, duo. is also reducing the environmental impact of their transportation.

Optimizing the weight and volume of our products not only benefits the customer but also minimizes their environmental footprint throughout their lifecycle (less cardboard, less adhesive tape, less fuel, less storage space...)

Our products are manufactured using recycled aluminium and we work hand in hand with our suppliers to limit waste.

The duo.recycling programme reuses products which have reached the end of their lifecycle.

We now recommend covering our structures with fabrics made from recycled fibers and printed with dye sublimation inks (a printing process using water based inks, containing 80% water).

Today, duo.'s approach is based on a simple idea : offering irresistible eco-friendly products !
