hello.xpress

The new generation case-to-counter

5 good reasons to choose **hello.xpress**

- **hello.xpress**

1 case
1 counter
2 xpressions 3x1

1. A smart solution : a case which converts into a counter and holds two structures
2. A tool that allows you to meet customers wherever they are : trade fairs, conferences, exhibitions, sales points or workplaces
3. An « all-in-one solution » offering a case with a display area, a presentation counter and storage space
4. The case requires minimal logistical organization (no extra packaging, no tools and easy handling)
5. Ideal for hassle-free travel by plane or train.

Choose the **hello.** most suited to your needs

hello.counter **xpress**

counter case H 890 mm,
counter top 927 mm x 453 mm

hello.xpress

Our commitments

Today, commitment to the environment has to be more than just an idea. It must be translated into practical measures ! That is why our Research and Development team strive to design products that are as ergonomic as possible whilst minimizing the quantity of materials used.

By working to reduce the weight of our products, duo. is also reducing the environmental impact of their transportation.

Optimizing the weight and volume of our products not only benefits the customer but also minimizes their environmental footprint throughout their lifecycle (less cardboard, less adhesive tape, less fuel, less storage space...)

Our products are manufactured using recycled aluminium and we work hand in hand with our suppliers to limit waste.

The duo.recycling programme reuses products which have reached the end of their lifecycle.

We now recommend covering our structures with fabrics made from recycled fibers and printed with dye sublimation inks (a printing process using water based inks, containing 80% water).

Today, duo.'s approach is based on a simple idea : offering irresistible eco-friendly products !
